[min_integer_math] 20180323_最小整数问 题

这个题是输入'0-9'的数字,要求不能组合的最小正整数。

找出出现次数最少的数即可。但是这个题只通过了60%,有大数问题还没有解决。long long 也不行。

```
int minNum(string s) {
   int ret = 0;
   int count[10] = {0};

for (auto ch : s) {
      count[ch - '0']++;
   }

   int min_count = INT_MAX, min_index = 0;
   for (int i = 0; i < 10; ++i) {
      if (i != 0 && count[i] == 0)
          return i;
      if (i != 0 && count[i] < min_count || i == 0 && count[i] <
min_count - 1) {</pre>
```

```
min_count = count[i];
    min_index = i;
}

if (min_index == 0)
    ret = 1;

while (count[min_index] > -1) {
    ret = ret * 10 + min_index;
    count[min_index]--;
}

return ret;
}
```
